LinkedIn: <https://www.linkedin.com/in/aditya-kamal-sharma/> • GitHub: <https://github.com/adityakamalsharma>

Professional Summary

- Offensive Security Certified Professional (OSCP) specializing in manual exploitation, advanced Active Directory attack paths, and web application penetration testing.
- Proven ability to execute Assumed Breach methodologies and engineer custom exploit scripts in Python, Bash, and Go.
- Integrates AI-driven CLI workflows directly into terminal environments to automate vulnerability analysis and payload prototyping.

Technical Skills

- Security Domains: Web Application Penetration Testing, Active Directory Exploitation, Privilege Escalation, Cloud Security
- Languages: Python, Bash, SQL
- Tools & Infrastructure: Kali Linux, Git, Burp Suite, BloodHound, Metasploit, Nessus
- AI & Automation: Gemini CLI, Claude CLI, LLM-Assisted Payload Prototyping

Education

Atal Bihari Vajpayee Government Institute of Engineering & Technology - Shimla

B.Tech - Computer Science and Engineering

Certifications

Offensive Security Certified Professional (OSCP+) | OffSec | April 2026

Experience

Valen Agency | Shimla, India | December 2025 – Present

Operations and Tech

- Directed technical infrastructure and operational workflows to support business development and client engagements.
- Managed secure communication channels and streamlined operational workflows.

Projects

HackTheBox Seasonal Campaign | Spring 2026

- Achieved global Platinum Tier by exploiting 10/13 complex targets and establishing persistence.

Enterprise AD Attack Lab | 2025 – 2026

- Executed cross-forest trust, delegation abuse, and DCSync attacks.
- Mapped attack paths using BloodHound and engineered scripts for lateral movement.

Pentesting & AI Exploit Development | 2024 – 2026

- Compromised 300+ machines across PG Practice, VulnLab, and HTB.
- Integrated Gemini/Claude CLI to automate recon, parse vulnerabilities, and prototype Python/Bash payloads.
